Action
Receive feasibility report and order public hearing for the Annapolis Street Reconstruction Project CP 23-1.

Background
Attached is a copy of the feasibility report completed by the City’s consultant, Kimley-Horn, for the above-referenced project. The report evaluates the feasibility of proposed improvements to Annapolis Street from Smith Avenue to Kansas Street. The report contains a description of the proposed improvements, preliminary cost estimates, preliminary assessment rolls/maps and a proposed project schedule.

Council is also required to call the public improvement hearing for the project on April 11, 2022. Per state statute, the City Council must call the improvement hearing and publish the hearing date twice, at least three days before the improvement hearing. Staff intends to publish the notice in the March 21 and 28, 2022, editions of the Pioneer Press.
