Action	
Award a contract to WSB for materials testing on the Annapolis Street Reconstruction Project, City Project 23-1, in the amount of \$60,740.	
Background	
<p>The Annapolis Street Reconstruction Project is on the City's state aid system. State aid roads require specific materials testing during construction. The MnDOT Schedule of Materials Control determines the required testing rates based on quantities and production rate. Sand, aggregate, concrete, asphalt and trench compaction is all tested.</p> <p>WSB provided a proposal for this two-year construction project that ensures all required testing will be completed. WSB has successfully completed materials testing over the majority of the reconstruction projects in the past 8 years.</p>
