Action	
Order preparation of a feasibility report and approve the attached resolution for the Delaware Avenue Reconstruction Project, City Project 25-3.	
Background	
<p>Dakota County is planning to reconstruct Delaware Avenue, County Road 63, in conjunction with West St. Paul and Mendota Heights. 2027 construction will be from Dodd Road to Wentworth Avenue and 2028 construction from Wentworth Avenue to Marie Avenue. Breaking this project up at Wentworth Avenue makes it more palatable for a contractor to complete and allows for detours of Wentworth Avenue to TH 149 to be used for most of the project.</p> <p>City Council is requested to order the preparation of a feasibility study for the Delaware Avenue Reconstruction Project, City Project 25-3. Dakota County is the lead on this project however both cities will be participating in the cost. The attached map shows the portion of Delaware Avenue that will be included in the feasibility report.</p>
