

Inflow & Infiltration Reduction Program Winter 2018

In 2019, I&I inspections will focus on the remaining Livingston, Wentworth and Delaware properties slated for street improvements. Additionally, about 100 properties in Metersheds 056 & 057 will be asked to voluntarily have inspections completed. This is occurring in an effort to avoid any surcharges and prevent sanitary sewer overflows in that area.

Total Inspections (2008-2018)

2,730

Private Sewer Laterals Rehabilitated Since 2008
