Inflow and Infiltration Discussion

BACKGROUND INFORMATION:

The City's inflow and infiltration (I/I) program has been on-going since 2008. While the city ordinance and overall process has gone through a few iterations since inception of the program, the overall goal of reducing/eliminating clean water from entering the sanitary sewer system has remained the same.

With a program that has been around for so many years and impacts all property owners in the city, it is important that it be revisited from time to time. In order to properly discuss the overall I/I program it is important to include the Metropolitan Council. There will be two representatives from the Metropolitan Council present to give a short presentation and then get into questions/discussion of the I/I program.

STAFF RECOMMENDATION:

Staff is looking for discussion on the I/I program.
